

# JOB OPENING Intelligence

## FMV IMAGERY ANALYST

**DATE:** Immediate Hire  
**LOCATION:** Fort Bragg, NC  
**SALARY:** Variable

*To apply follow the instructions below on right-hand side. Read all requirements before applying and contact directly if you have questions.*

### JOB DESCRIPTION:

The JGASS contract is currently staffing Imagery Analysts to serve on a unique, multi-discipline team providing Geospatial Intelligence and Imagery Intelligence Analysts in support of on-going and future operations that are executed in Declared Theaters of Active Armed Conflict (DTAAC) and Outside Declared Theaters of Active Armed Conflict (ODTAAC). The purpose of this support is to provide US Special Operations Command with personnel experienced in the functional spectrum of Imagery Intelligence (IMINT) and Geospatial Intelligence (GEOINT). This support directly contributes to the USSOCOM capability to meet known and emergent mission requirements and operations assigned by the Secretary of Defense.

### JOB RESPONSIBILITIES:

The Imagery Analyst shall perform high level/expert imagery analysis, imagery product production, intelligence systems architecture and evaluation of procedures, processes, techniques, models and/or methodologies used to develop complex solutions to requirements. The Imagery Analyst shall have operational and tactical level intelligence experience to include general experience in the fields of targeting, intelligence systems, and geospatial systems. The Imagery Analyst shall have briefing skills and be capable of effectively directing subordinate analysts in the accomplishment of intelligence products and assessments. The Imagery Analyst shall be proficient in utilizing computer applications and intelligence related automation to support analytical efforts and product development.

### ADDITIONAL JOB SPECIFICS:

Perform high level/expert imagery analysis with emphasis in targeting, imagery product production, intelligence systems architecture and evaluation of procedures, processes, techniques, models and/or methodologies used to develop complex solutions to requirements.

While CONUS, analysts work a Panama-type schedule; 3 days on, 4 days off one week, 4 days on, 3 off the next. 12 hour shifts. Rotate days and nights every 60 days. May require one 120 day deployment.

Be able to work in 2 man teams, one conducting screening and callouts while the other does production.

Ability to "ghost type" not looking at the keyboard and type well over 40 words per minute.

Must be highly proficient in using basic computer applications such as Microsoft Office, SOCET GXP, ArcGIS and MAAS.

### MINIMUM QUALIFICATIONS

- Requires FMV Screening experience
- Active/Current TS/SCI security clearance verifiable in JPAS
- IMINT or GEOINT MOS School
- SOCET GXP, ArcGIS and MAAS
- Special Operations Forces (SOF) FMV support is highly desirable
- F3EA targeting cycle
- 4 years of technical experience
- Capable of 120 day deployments
