

State Emergency Alert System Plan

2013

Promulgation Letter

August 5, 2013

The State of Kansas may be subject to a variety of emergencies and disasters to which it should be prepared to respond. Such emergencies and disasters may have harmful effects upon the citizens of Kansas, but those effects can be mitigated by effective planning, operations, and public communication, which should represent a coordinated effort of all resources available to the state. The State of Kansas Emergency Alert System Plan is the result of such an effort, obtained through the Adjutant General's Department, Division of Emergency Management, with the cooperation of the State Emergency Communications Committee, the broadcasters and cable systems within the state. This plan has been established pursuant to KSA 48-926 and FCC CFR 47, Part 11.

The Adjutant General/Director of Emergency Management is authorized to activate and deactivate the State Emergency Alert System. Federal messages will pass automatically throughout the State of Kansas Emergency Alert Relay System.

This plan shall serve as the procedure for public emergency alerting should an emergency or disaster strike anywhere in the state. This plan sets forth explicit responsibilities based upon statutory mandates and/or capabilities for the broadcasters and cable systems in Kansas.

As Governor of the State of Kansas, I hereby approve the 2013 State of Kansas Emergency Alert System Plan and commend all parties involved in its preparation for their commitment and dedication to protect the lives of the citizens of the State of Kansas.

This fifth day of August 2013,

Sam Brownback
Governor

Concurrences

The below signatories concur with the contents of the State of Kansas Emergency Alert System Plan as prepared the input of the Kansas broadcasters, cable system operators, county emergency mangers, and the National Weather Service forecast offices through representation on the State Emergency Communications Committee.

Roy Baum, Chairperson
State Emergency Communications Committee

Purpose

The purpose of this document is to provide and explain procedures for the dissemination of emergency information by the appropriate broadcast, cable, and government officials during threatened or actual emergencies.

Authority

Title 47 of the Code of Federal Regulations (CFR) deals with the Federal Communication Commission (FCC) Rules and Regulations. Part 11 of CFR Title 47 gives the authority for and regulates the operation of the Emergency Alert System.

Introduction

This plan was developed by the Kansas State Emergency Communications Committee, in cooperation with the Kansas Division of Emergency Management, the Federal Communication Commission, the National Weather Service in Dodge City, Goodland, Topeka, Wichita, Hastings, NE, Pleasant Hill, MO, Springfield, MO, state and local officials, and the broadcasters and cable operators of Kansas. It provides background data and prescribes specific procedures for the broadcast and cable media to issue emergency information and warning to the general public in Kansas.

Acceptance of, or participation in, this plan shall not be deemed to prohibit a licensee or cable operator from exercising his independent discretion and responsibility in any given situation. The concept of management of each broadcast station or cable system to exercise discretion regarding the transmission of emergency messages and instructions to the general public is provided by the FCC Rules and Regulation, Part 11. Broadcast stations and cable systems originating emergency communications under this section have conferred rebroadcast authority of the other participating broadcast stations and cable systems that receive their emergency communication, as specified in Section § 11.54 (d) of FCC Part 11.

EAS Local Operational Area Plans will detail local EAS procedures agreed upon by the broadcasters, cable systems, and local governments. These local EAS plans will be included as Annexes to this plan.

General Considerations

The listening and viewing habits of the general public are inherent factors of consideration and are conducive to the positive effectiveness of the Kansas EAS. The instinctive reaction of the average person is to turn on his/her radio or television set in time of emergency. However, continued public education is required to increase public awareness of the Kansas EAS network as an established medium for the receipt and/or distribution of emergency information to the general public at the local, state, and national levels.

Definitions

Designated Government Officials: The person or persons designated as government signatory to this procedure to request activation of the EAS and to make emergency announcements (see Annex A).

Emergency: A situation posing an extraordinary threat to the safety of life and property. Examples are, but not limited to, natural situations such as tornadoes, flash floods, icing conditions, heavy snows, widespread fires; and manmade situations such as discharge of toxic gases, widespread power failures, industrial explosions, civil disorders, and nuclear incidents.

Local Primary (LP): The local area broadcast station which provides the National, State, and Local EAS message to the other broadcast stations and cable systems within its local area.\

National Primary (NP): Broadcast station that provides the Presidential or other national EAS activations and programming, including broadcast stations involved with the PEP system and EAN Networks.

Non-Participating National (NN): Broadcast station or cable system that has selected not to participate in the national-level EAS and removes its carrier from the air if national-level activation occurs.

Participating National (PN): Broadcast stations and cable systems which monitor either national, state, or local EAS message inputs and directly feed National EAS messages to the public.

Primary Entry Point: Key broadcast stations throughout the U.S. which together can provide national emergency information in the event that the primary national alerting methods are inoperable.

Severe Weather Warning: A severe weather WARNING indicates that a particular severe weather storm has actually been sighted in an area or indicated by radar, and serves notice to the public that severe weather conditions are almost certain to occur.

Severe Weather Watch: A watch is issued when weather conditions are favorable for the development of severe thunderstorms that are capable of producing large hail, damaging winds or tornadoes. A watch does not mean that the severe weather is actually occurring; only that conditions have created a significant risk for it. If severe weather is imminent, a warning will be issued.

State Primary (SP): The primary broadcast station which transmits State of Kansas and National EAS messages. These messages can originate from the Governor or a designated representative or the National Weather Service. The EAS messages can be initiated in the State Emergency Operation Center (SEOC) or from WIBW-FM radio station. Messages are sent via the Kansas Information Network (satellite) or the State Relay Network to the LP stations for further rebroadcast in the Local EAS Operational Area.

State Relay: An entity which receives and retransmits EAS activations. The entity serves as a link in the State Relay Network and assists transmitting a state activation to all Local EAS areas.

Concept of Operation

- A. Kansas EAS system uses the Kansas Information Network (KIN) satellite network to simultaneously communicate the National and/or State EAS message to the Local Primary stations. The KIN network is operated by WIBW-FM, the State Primary.
- B. The State Relay (SR) network serves as a backup to the satellite network (see Annex D). The relay network is a web structure initiating from WIBW-FM and KTPK-FM stations. The network fans out across the state in four tiers or hops from one State Relay station to the next. Each SR station monitors at least one of the upper tier stations and rebroadcasts the EAS message. The State Relay or KIN supplies the National and State EAS messages to Local Primary Stations.

Methods of Access for System Activation

A. State Activation

Kansas EAS is activated by a request from authorized officials to the State's EAS State Primary (SP). The State Emergency Operation Center (SEOC) and WIBW in Topeka are key with respect to activation of the EAS at the State level. State Relay stations monitor the SP in accordance to the Kansas EAS State Relay Network plan (see Annex H). The functioning of this network of state relay station is key to the successful dissemination of State level EAS emergency information.

B. Federal Activation

Access to the nationwide EAS network by Federal authorities is achieved by Federal interface with radio stations, television networks, participating subject cable systems, communications common carriers, wire services, and other participating organizations. The Federal EAS message is sent to WHB-AM, a Primary Entry Point (PEP) station, which is monitored by WIBW-FM (SP) and KTPK-FM (SP-1). The Federal EAS message is then relayed to the Kansas public via the Kansas EAS Relay System.

C. County/Local Activation

Operational area and/or individual Counties’ EAS activation procedures are defined in Local EAS plans. Each Local Operational Area is encouraged to establish a Local EAS plan for use of the broadcast and cable media for distribution of emergency information to the general public. The procedures contained in this document do not pertain to County or Local governmental operations.

D. National Weather Service Activation

Standard Operating Procedures (SOP) prescribe that the NWS notify KDEM of any watch or warning which affects all or part of the State of Kansas. This is accomplished by dissemination through the National Weather Wire Service and the state-side of the National Warning System (NAWAS). Although the likelihood of a statewide watch or warning may be slim, there may be occasions when a weather watch or warning would affect more than one EAS operating area.

Communication Links between Kansas Division of Emergency Management and the State Primary

- A. Commercial telephone exists between the Kansas Division of Emergency Management, the broadcast and cable facilities of the state.

	<u>Telephone Numbers</u>
State Primary (SP): WIBW-FM	(785) 272-3456 (785) 272-3481 (785) 228-7261
Kansas Division of Emergency Management	(785) 274-1409
Emergency Number (24 hr. coverage)	(785) 296-3176
National Weather Service:	
Dodge City	(316) 227-7140
Goodland	(785) 899-2360
Hastings, NE	(402) 462-2127
Kansas City-Pleasant Hill, MO	(816) 540-5147
Springfield, MO	800-762-4363
Topeka	(785) 232-0814
Wichita	(316) 942-8483

scheduled to explain response action. This should be articulated in a brief 90 second summary as to: where and when residents can tune in emergency information on actions being taken by state and/or local government(s). Note: Use channel frequency, avoid call letters. It is understood that more than one EAS Message may be necessary in large disasters.

4. Keep line open if necessary.
5. Issue End of Message (EOM).

II. Procedures for the State Primary (SP) Station, EAS Broadcast Stations and Cable Systems.

1. Upon receipt of a request to activate EAS at the state level, the duty operator at WIBW-FM (State Primary source) will authenticate (see Annex C), record the emergency message, verify that the message is for statewide distribution, enter proper header codes in the EAS encoder and proceed as follows:
 - a. Transmit the following announcement:
“WE INTERRUPT THIS PROGRAM TO ACTIVATE THE KANSAS EMERGENCY ALERT SYSTEM AT THE REQUEST OF _____
AT _____.”
(authority) (time)
 - b. Transmit the Emergency Alert System header codes and Attention signal: (FCC Regulations, Section § 11.51).
 - c. Transmit the following announcement:
“WE INTERRUPT THIS PROGRAM TO ACTIVATE THE KANSAS EMERGENCY ALERT SYSTEM AT THE REQUEST OF _____
AT _____.”
(authority) (time)
 - d. Make the emergency announcement. Repeat as necessary and include the source of information and the time received.
 - e. Transmit the EAS End of Message (EOM) code (See FCC Regulations, Section § 11.31). Note: the EOM is placed automatically after the two minute audio message.

2. Each broadcast station and cable system, upon receipt of a State level emergency action notification will, at the discretion of management perform the same procedures as outlined in B1 above, including recording all emergency messages.
3. To avoid unnecessary escalation of public confusion, all broadcast stations and cable systems must be cautious in providing information and news pertaining to the emergency. All messages must be based on definite and confirmed facts. The public must not be left to decide what is or is not factual.
4. Upon completion of the above transmission procedures, resume normal programming. Appropriate notations should be made in station and cable records and logs of all significant events. These records should be carefully preserved in the event they are required at some later date (FCC Regulations, Section § 11.55). Stations and cable systems may send a very brief summary to the FCC for informational purposes.
5. If operations were not concluded as specified in B.1.e. above, upon receipt of the termination notice from the activating official, make the following announcement and transmit the EOM code:

“THIS CONCLUDES OPERATIONS UNDER THE KANSAS
EMERGENCY ALERT SYSTEM. ALL BROADCAST STATIONS
AND CABLE SYSTEMS MAY NOW RESUME NORMAL
OPERATIONS.”

(Repeat announcement).

III. Delivery of EAS Messages by Cable Operators

1. The FCC requires all wired cable systems that serve 10,000 or more subscribers to install EAS equipment and provide EAS audio and video messages on all channels by December 31, 1998.
2. The FCC requires all wired cable systems that serve 5,000 or more, but fewer than 10,000 subscribers to install EAS equipment and provide EAS audio and video messages on all channels by October 1, 2002.
3. The FCC requires all wired cable systems that serve fewer than 5,000 subscribers either to provide the national level EAS message on all programmed channels – including the required testing – or to install EAS equipment and provide a video

interrupt and audio alert on all programmed channels and EAS audio and video messages on at least one programmed channel by October 1, 2002.

4. The FCC requires that wireless cable systems participate in the EAS on the same basis as wired cable systems.
5. The FCC declines, however, to require participation by Satellite Master Antenna Television (SMATV) and Open Video Systems (OVS) in the EAS at this time.

IV. Monthly Test

1. Statewide test of the Kansas Emergency Alert System:
The Required Monthly Test (RMT) is designed to check the State EAS Web links. The Kansas Emergency Communication Committee has set forth that the RMT will be a statewide test. The RMT is prescheduled and will be initiated from WIBW-FM, the SP. All stations need to rebroadcast the RMT as soon as possible but not later than 15 minutes after receipt. In Kansas, all broadcasters are at most only one station away from a WIBW-FM/or a “KIN” affiliate.

Required Monthly Test Schedule

Second Tuesday of the month at 1:50 p.m. (odd numbered months)

Second Tuesday of the month at 10:50 p.m. (even numbered months)

2. The required monthly test audio must be aired as received and stored by your EAS unit. Stations should not send their own tests generated by their EAS unit. This will cause additional messages to be re-sent by stations monitoring you. It is important that all stations broadcast the same message so it will have the same “Header Code”. Duplicates of a previous message having the same header code “Day-Date-Time”, will not be re-broadcast by the EAS equipment.
3. The following test script is recommended for use during required monthly test.
“THIS IS A COORDINATED MONTHLY TEST OF THE BROADCAST STATIONS OF YOUR AREA. EQUIPMENT THAT CAN QUICKLY WARN YOU DURING EMERGENCIES IS BEING TESTED. IF THIS HAD BEEN AN ACTUAL EMERGENCY SUCH AS (SEVERE WEATHER WARNINGS: *INSERT TYPES OF EMERGENCIES THAT MAY OCCUR IN THE GEOGRAPHIC AREA*), OFFICIAL MESSAGES WOULD HAVE FOLLOWED THE ALERT TONE. THIS CONCLUDES THIS TEST OF THE EMERGENCY ALERT SYSTEM. THIS STATION SERVES THE STATE OF KANSAS.”

4. Follow-up of a Failed Monthly Test

Upon discovering a failed test, you are required to call the transmitting station and discover the cause of the failed test. It is the responsibility of the stations on both ends of the link to ensure the EAS Monthly Test is transmitted and received successfully.

V. *Weekly Test*

1. The weekly test ensures that station to station links are up and running. Each station is required to originate and log their weekly test. Each station is also required to monitor and log receipt of weekly tests from both of their monitoring assignments. The print out should be attached to your station log for that day. A weekly test should be sent at various times of the day or night and should be sent on various days of the week including weekends.

2. Follow-up of a Failed Weekly Test

Upon discovering a failed test (i.e. weekly test not received), you are required to contact your monitoring source and discover the cause of the failed test. It is the responsibility of stations on both ends of the links to ensure the Weekly EAS Test is transmitted and received successfully.

VI. *Severe Weather Awareness Week*

Early in March, the National Weather Service and the County Emergency Management Coordinators gear up for Severe Weather Season. The Severe Weather Spotters attend training to review correct spotting techniques. The communication systems and warning system, such as the Tornado sirens and also the Emergency Alert System (EAS) are tested. The most assured way to check the EAS links is for the National Weather Service to send an agreed upon code during the state wide Tornado test. The National Weather Service is the lead agency for this test. The National Weather Service will coordinate with the Emergency Management Coordinator and broadcasters as to whether the test will be organized state wide or on a regional basis. Contact the National Weather Service Office that services your area for specific information.

Reporting EAS System Changes or Problems

Any changes in the monitoring assignment need to be coordinated through the Kansas State Emergency Communication Committee. Problems receiving weekly and monthly test that are unable to be resolved need to be reported to the KSECC within 30 days of occurrence. The KSECC needs to know where the EAS links are incomplete and will work to coordinate a

solution. These concerns can be forwarded to the Kansas Division of Emergency Management, Attention the KSECC.

Plan Review Requirements

This plan recognizes that the components of the EAS network are dynamic in nature; the Kansas State Emergency Communications Committee (SECC) conducts ongoing research and development of communications capabilities across the state in conjunction with the broadcasters, cable system operators, Kansas Division of Emergency Management (KDEM), Federal Emergency Management Agency (FEMA), Federal Communications Commission (FCC), and other interested parties. Needs, facilities, and technology all change with time – these changes requires periodic review of this plan to ascertain the adequacy and appropriateness of the various system parameters. The SECC in conjunction with the broadcasters, cable system operators, KDEM, FEMA, FCC, and other interested parties will review this plan annually and revise the plan every 3 years.

The Kansas State Emergency Communications Committee (SECC) in conjunction with the broadcasters, cable system operators, Kansas Division of Emergency Management (KDEM), Federal Emergency Management Agency (FEMA), Federal Communications Commission (FCC), and other interested parties will review this plan every three years. Changes to the network configuration and/or this plan will be coordinated by the SECC. All participants of Kansas EAS network will be advised of these changes. Any entity participating in this plan is invited to provide written feedback as desired.

Annex C

Authentication Procedures to Activate the Kansas EAS

This Annex and its Annex must be located and stored near the Access Control Operator (ACO) and be readily available for use.

Purpose

The procedures described herein are intended to:

1. Provide the State Primary with the means to identify the request officials authority to activate the statewide EAS network
2. Provide the State Primary with a mechanism that safeguards the integrity of the EAS network.

Types of Authentication

The three types of authentication are: 1) Personal acquaintance and/or recognition, 2) Authentication code, and 3) Encoded EAS message sent from the State EOC.

Use of Authentication Procedures

- A. “Personal recognition” authentication is appropriate and adequate:
 1. When the official requesting activation is face to face with the ACO
 2. When the ACO readily recognizes the identity of the requesting official
- B. “Authentication Code” authentication is the default method of verifying the requesting official’s authority to activate the EAS Network. When the ACO is unable to verify the authority of the requesting official through the above method of authentication, the ACO must ask for (and receive) the correct authentication words (See Annex 1, Annex C). Should the ACO receive an incorrect authentication word, the requesting official will be denied access/activation of the EAS network.
- C. If the EAS message is sent via the assigned monitoring station, (i.e. Kansas Emergency Operations Center via Remote Pick Up (RPU), National Weather Service or National Weather Service, or National Primary), it is assumed to be a closed system, no further authentication is necessary.

Termination

Authentication procedures apply for both activation and termination of the EAS network.

Annex H

Kansas EAS Event Codes

Event Code	Event Description
ADR	Administrative Message
AVA	Avalanche Watch
AVW	Avalanche Warning
BZW	Blizzard Warning
CAE	Child Abduction Emergency
CDW	Civil Danger Warning
CEM	Civil Emergency Message
CFA	Coastal Flood Watch
CFW	Coastal Flood Warning
DMO	Demonstration Message
DSW	Dust Storm Warning
EAN	Emergency Action Notification (Begins a nationwide EAS activation)
EAT	Emergency Action Termination (Ends a national activation)
EQW	Earthquake Warning
EVI	Evacuation Immediate
FFA	Flash Flood Watch
FFS	Flash Flood Statement
FFW	Flash Flood Warning
FLA	Flood Watch
FLS	Flood Statement
FLW	Flood Warning
FRW	Fire Warning
FSW	Flash Freeze Warning
FZW	Freeze Warning
HLS	Hurricane Statement
HMW	Hazardous Materials Warning
HUA	Hurricane Watch
HUW	Hurricane Warning
HWA	High Wind Watch
HWW	High Wind Warning
LAE	Local Area Emergency
LEW	Law Enforcement Warning
NAT	National Audible Test
NIC	National Information Center Statement (Used to follow up an EAN)
NMN	Network Message Notification
NPT	National Periodic Test
NST	National Silent Test
NUW	Nuclear Power Plant Warning

Event Code	Event Description
RHW	Radiological Hazard Warning
RMT	Required Monthly Test
RWT	Required Weekly Test
SMW	Special Marine Warning
SPS	Special Weather Statement
SPW	Shelter In-place Warning
SVA	Severe Thunderstorm Watch
SVR	Severe Thunderstorm Warning
SVS	Severe Weather Statement (U.S., CAN)
TOA	Tornado Watch
TOE	911 Telephone Outage Emergency
TOR	Tornado Warning
TRA	Tropical Storm Watch
TRW	Tropical Storm Warning
TSA	Tsunami Watch
TSW	Tsunami Warning
VOW	Volcano Warning
WSA	Winter Storm Watch
WSW	Winter Storm Warning

Annex I Kansas EAS Relay Network

Annex J

Integrated Public Alert and Warning System (IPAWS)

During an emergency, alert and warning officials need to provide the public with life-saving information quickly. The Integrated Public Alert and Warning System (IPAWS) is a modernization and integration of the nation's alert and warning infrastructure and will save time when time matters most, protecting life and property.

Federal, State, territorial, tribal and local alerting authorities can use IPAWS and may also integrate local systems, which use Common Alerting Protocol standards, with the IPAWS infrastructure. IPAWS provides public safety officials with an effective way to alert and warn the public about serious emergencies using the Emergency Alert System, Wireless Emergency Alerts, NOAA Weather Radio, and other public alerting systems from a single interface. Additional information about IPAWS and how to apply for public alerting permissions can be accessed online at <http://www.fema.gov/integrated-public-alert-warning-system>.

IPAWS Architecture

Standards Based Alert Message protocols, authenticated alert message senders, shared, trusted access & distribution networks, alerts delivered to more public interface devices
