Durable Medical Equipment Locations

The term durable medical equipment is one most used by Medicare and Social Security to describe medical devices that are needed by a patient for specialized medical care in a patient's home or long-term care institution.

This equipment can include transportation assistance, canes, crutches, bed-lifts, breathing apparatuses and some diabetic supplies. Durable Medical Equipment or DME, is a specified paid Medicare benefit for people who need at-home assistance following an accident or illness. This care may be considered temporary or permanent.

In order for equipment to be considered durable medical equipment, it must be reusable.

Reusable medical equipment would include things like wheelchairs, crutches, blood-glucose monitors and the strips used in them. It also includes things like chair-lifts, where the lift mechanism is covered, but the chair is often not covered.
